The article aims to highlight the advantages of interactive education and its importance in the educational process.*

**Key words:** *Interactive education, English language lessons, independent thinking, student participation, group work, games, role playing, multimedia tools, educational process, teaching methods.*

The rapid development of modern society forces the student to quickly learn and understand the material, especially a foreign language. Nowadays, mastering at least one foreign language is becoming an indispensable requirement for the professional qualification of a specialist. Therefore, it is necessary to pay attention to the efficiency and quality of the process of learning foreign languages. The most effective methods of language learning are interactive methods. The purpose of the article is to determine the main role of interactive methods in teaching English. To achieve the goal, the following tasks were defined: to describe the main interactive methods and to give examples of the use of these methods. The term "interactive" means that people work together and influence each other. This situation implies a dialogue or conversation. Therefore, these methods are focused on the interaction between students and the teacher, as well as only between students. Advantages of interactive educational methods.

**1. Active Participation:** students are actively involved in the lesson by expressing their opinions, asking questions and discussing. This, in turn, develops their communication skills.

**2. Developing Creativity:** through role-playing or project-based activities, students will have the opportunity to express their creativity.

**3. Increase Interest:** Using games and multimedia tools makes lessons more interesting and engaging, which increases students' motivation.

**4. Independent Thinking:** students have the opportunity to think independently and apply their knowledge in practice. This requires an active role of students in the learning process. Interactive methods are called group thinking, that is, methods of pedagogical

## MODERN EDUCATIONAL SYSTEM AND INNOVATIVE TEACHING SOLUTIONS

influence, which are a component of educational content. One of the unique features of interactive methods is that they are carried out in cooperation with the teacher and students, through joint activities. The goal of interactive education is to create special conditions that lead to the involvement of all students in the learning process, in which participants understand and are aware of everything that is happening, influence each other and contribute. can add, establish friendly and mutually beneficial relations. Interactive ("**Inter**" - **mutual** and "**act**" - **to act**) - this method is called collective thinking, that is, it is a method of pedagogical influence and is a component of the educational content. One of the unique features of interactive methods and technologies is that they are implemented in cooperation with teachers and students, through joint activities. The purpose of interactive education is that all participants of the lesson interact. All of them actively participate in the educational process. The teacher works as an assistant. In the process of interactive methods and technologies, students learn to think, solve problems, make decisions and participate in discussions. There are many interactive methods and technologies in modern pedagogy.

A key element is role-playing, which provides an opportunity to develop skills that are difficult to acquire in a regular educational setting. The game gives timid, insecure students the opportunity to speak up and thereby overcome the barrier of uncertainty. In a typical discussion, the student leaders take the lead and the shy stay silent. Also, below we will analyze some of the interactive methods for learning English. Variation method - half of the audience takes one position, and the other half takes another position. Students line up and face each other. Each student can speak only once so that all students on both sides can decide the issue. Optimist/pessimist method-In pairs, students take opposite emotional sides of a case, statement, or topic. Encourage them to be empathetic and truly "live" in their learning of the situation. You'll find good solutions and your students will learn some great social skills. Peer Review Writing Task - Encourage students to share drafts with a partner to help them complete the writing task. A partner reads the essay and writes a three-paragraph response: the first paragraph points out the essay's strengths, the second paragraph discusses the essay's problems, and the third paragraph describes what the partner should focus on when revising. his essay. Students can learn a lot from each other and from themselves! Here are 10 more creative self-assessment ideas. Who/who am I? Method - stick a term or name on the back of each student. You can also stick them on your forehead. Each student goes around the room and asks other students yes or no questions to guess the term. Of course, this term is related to the topic of your lesson. Bingo is a fun game that can be used for all kinds of exercises: language exercises, introductory games, math exercises, etc.

Interactive learning methods play an important role in the organization of English language classes. They increase student interest, encourage active participation, and develop independent thinking skills. Teachers can make lessons more effective and interesting by using these methods. As a result, students not only acquire language skills, but also develop creative thinking and communication skills.
