Abstract. *This article highlights the role and importance of foreign languages in modern life, how important they are among professions. Because learning and knowing foreign languages is not only for travel, but allows you to become a leader in any field.*

Key words: *foreign language, professional competence, language, pedagogical experience, skills, effectiveness of foreign languages.*

Nowadays, as our country is developing, the demand for foreign languages is increasing. As a result, many young people are learning foreign languages with their own interest and enthusiasm. Another advantage of learning foreign languages is that knowing a foreign language will greatly help to improve your cognitive and analytical skills. If you learn a foreign language every day and develop it day by day, that is, if you memorize words and perform various exercises every day, your cognitive and analytical skills will increase. A good way to increase your knowledge and social circle while learning a language is to connect and talk with people who are learning the language. Nowadays, more and more employers are looking for people who are fluent in foreign languages. That is, by knowing foreign languages, we can work in many places. Today, it is very important for everyone to know foreign languages. The world is becoming more and more globalized and knowing two languages is not just a fad, but a need of the hour.

Today is the era of globalization. This era requires humanity to keep up with the times. Therefore, it is desirable for specialists in various fields to know and communicate in several foreign languages in addition to having a perfect knowledge of their native language. For this, improving the system of learning and teaching foreign languages with more modern methods and increasing the motivation to learn foreign languages is of great importance. Acting according to our multilingual Farobi, a broad observation that is at the level of comparative study of several languages It is an inheritance from our mature ancestors like Kashgari. Based on this, it is no secret to any of us that knowledge of foreign languages is a requirement for today's youth. By learning foreign languages on the basis of modern technologies, learning foreign languages is relevant and important in order to ensure the special place of our country Uzbekistan in the world community and to apply it more widely. The role of young people and the foreign languages they learn is invaluable in ensuring that Uzbekistan gains its place among the nations of the world. To further strengthen this, the metaphor of language acts as a bridge.

Knowledge of foreign languages is important and multifaceted for doctors and medical workers. Below are its main reasons:

MODERN EDUCATIONAL SYSTEM AND INNOVATIVE TEACHING SOLUTIONS

1. Access to scientific knowledge and innovations: Medicine is one of the fastest growing fields. Most advanced scientific articles, studies and news are published mainly in English, German, French and other foreign languages. Knowing foreign languages, doctors are quickly aware of world news, which helps to improve their skills.

2. Effective communication with patients: Doctors who know foreign languages communicate with patients from abroad without language barriers. This allows for a better understanding of the condition of patients and the correct determination of the necessary treatment measures.

3. Exchange of international experience: Doctors who know a foreign language will have the opportunity to participate in international conferences, seminars and scientific conferences. They can learn the experiences and approaches of other countries in the field of medicine and apply them in their own country.

4. Working with medical documents: Some modern medical equipment has manuals and instructions in foreign languages. Knowing these languages, doctors will be able to read technical documents and use them correctly.

5. Writing scientific articles and studies: By publishing their articles and studies in international scientific publications, doctors can share their experience with other countries. This will greatly help international recognition and career growth in the field of medicine.

6. Obtaining information about medicines: Most of the medicines are produced in foreign countries, and information on their use is mostly written in foreign languages. Doctors who know a foreign language provide accurate information about drugs to patients.

Therefore, learning foreign languages greatly helps medical workers not only to improve their skills, but also to provide better medical care for patients.

The benefits of learning foreign languages for entrepreneurs and businessmen are shown in the following aspects:

Entering the international market: If an entrepreneur knows a foreign language, he will not face any language barrier when entering foreign markets. This makes it possible to develop business on an international scale, to work effectively with new clients and partners.

Communicating with new partners: Entrepreneurs who know foreign languages will have the opportunity to expand their activities by participating in international business meetings and conferences. By knowing foreign languages, it becomes easier to establish reliable and strong relations with partners.

Direct communication with customers: Entrepreneurs communicate directly with foreign customers by knowing foreign languages. This helps to improve the quality of customer service and to better understand their needs.

Increasing competitiveness: An entrepreneur who knows a foreign language will be one step ahead of the competition. He will have the opportunity to compete in new markets, work on an equal footing with global companies and use their advanced experience.

Use of foreign resources: Many useful books, articles, studies and educational materials on business are published in foreign languages around the world. Entrepreneurs who know foreign languages can directly use these resources and improve their knowledge.

Cultural

MODERN EDUCATIONAL SYSTEM AND INNOVATIVE TEACHING SOLUTIONS

awareness and empathy: By learning a foreign language, entrepreneurs can better understand the culture, business practices and values of other countries. This increases cultural sensitivity and helps to achieve successful results in interaction. Financial benefits: Knowledge of foreign languages often brings economic benefits in business deals. As a result of not requiring mediation between local companies and foreign companies, it is possible to save money and time. Use of technological innovations: Many modern technologies and IT solutions are developed in foreign languages. Entrepreneurs who know a foreign language will be able to understand these technologies and use them in their business.

In general, knowledge of foreign languages allows entrepreneurs and businessmen not only to expand their business, but also to be internationally competitive, to establish effective relations and achieve continuous growth.

The importance of knowing foreign languages for teachers and professors is of great importance in the following aspects:

1. Access to scientific and educational materials: Many scientific studies, articles and educational resources are published in foreign languages, especially in English. Teachers and professors who know a foreign language will have the opportunity to use these scientific resources to update their knowledge and enrich their lessons with modern materials.

2. Exchange of international experience: Knowledge of a foreign language gives teachers the opportunity to participate in international conferences, seminars, and academic exchange programs. They can study the world experience, improve their pedagogical methods and introduce innovations into their lessons.

3. The possibility of publishing in international scientific publications: Teachers and professors can publish articles in international scientific publications and introduce their scientific achievements to the wider world by knowing foreign languages. This has a positive effect not only on them, but also on the reputation of the university or scientific institution where they teach.

4. Providing high-quality education for students: Teachers who know a foreign language can use international sources to convey modern and versatile knowledge to their students. This helps to educate students in accordance with the requirements of the modern world and expand their knowledge.

5. Monitoring global changes: Teachers and professors who know foreign languages are quickly aware of international news and trends in the field of education. This allows them to constantly update their lessons and adapt to the world education system.

6. Development of international relations: pedagogues who know a foreign language will have the opportunity to develop international relations with various universities, organize joint projects and exchange experience with foreign colleagues.

7. Development of cultural sensitivity: By learning a foreign language, teachers understand the culture and values of other countries. This helps them to work with foreign students and gain cultural sensitivity in international classes.

8. Opportunity to receive grants and scholarships: Teachers and professors who know a foreign language will have the opportunity to receive international grants and scholarships. This makes it possible to have financial resources for scientific research and personal development.

9. Increasing students' interest in learning foreign languages: A teacher who knows a foreign language can show the importance of learning foreign languages to his students as an example. This makes students interested in learning foreign languages and contributes to their intellectual development. In general, knowledge of foreign languages opens the door to scientific achievements and academic development for teachers and professors. will help.

The key to effective teaching of foreign languages is in the process of training teachers who possess modern knowledge and have high-level foreign language skills.

As can be seen from the above, the level of language knowledge is gaining importance in every field. The number of students enrolled in higher education institutions is increasing year by year, which in turn means that the competition for employment will be strong. Personnel who not only know the field well, but also have an IELTS or CEFR certificate in a foreign language are needed everywhere today. English is also very important in the field of information technology. The fact that the world's newest information, data and communication technologies are translated into English is of great importance in international cooperation. Along with these, for the main reasons given above, the place and importance of the English language in Uzbekistan is great. The teaching and learning of this language increases the position of our country in international relations and gives new opportunities. The role of learning English in Uzbekistan is much higher than before. PQ-1875 on December 10, 2012 regarding training The decision "On measures to further improve the system of foreign language learning" was adopted. One of the serious problems in language learning is related to the methods and methods of language learning. Another problem is that English and other foreign languages are taught in schools for too few hours. In addition, innovative technologies play an important role in learning foreign languages. Innovative technologies also have advantages. Professionally competent teachers understand the importance of integrating cultural elements into teaching, developing intercultural understanding and creating a multicultural learning environment. By incorporating cultural content, traditions, and perspectives into lessons, teachers enrich the language learning experience and help students develop intercultural competence. In today's digital age, technology plays an important role in language education. Professional competence in foreign language teaching includes the ability to use technology effectively to improve learning outcomes. Teachers must be proficient in using digital tools, multimedia resources and online platforms to create interactive and engaging language lessons. By incorporating technology into instructional practices, teachers can facilitate language practice, collaboration, and communication, as well as provide students with opportunities for autonomous learning and inquiry. Professional competence in foreign language teaching is a dynamic and continuous process that requires a commitment to continuous

MODERN EDUCATIONAL SYSTEM AND INNOVATIVE TEACHING SOLUTIONS

professional development. Language teachers should engage in lifelong learning, stay abreast of current research and trends in language education, and seek opportunities to improve their teaching skills. By attending workshops, attending conferences, obtaining advanced certifications, and reflecting on teaching practice, teachers can continually improve their professional skills and provide high-quality language teaching. Professional competence in foreign language teaching includes a multifaceted combination of language proficiency, pedagogical knowledge, cultural awareness, technological knowledge, and commitment to continuous professional development. By incorporating these important components, language teachers can create a vibrant and productive learning environment that inspires students to develop language knowledge, cultural competence, and a lifelong passion for language learning. Educators strive to improve their professional skills, contribute to student growth and success, and nurture a generation of global citizens equipped with the skills and knowledge to thrive in an interconnected world.

What are the tasks of the vocational education system for young people to acquire a profession and start their own business?

In the world's experience, the development of professional education is an important system for reducing poverty and acquiring appropriate qualifications for young people.

Taking these goals into account, on October 16 of this year, the Presidential Decree "On measures to further improve the system of training qualified personnel in vocational education and introduce international education programs" was signed. We were interested in the opinions of the Minister of Higher Education, Science and Innovations, Kungirovboy SHARIPOV, regarding the essence and goals of this decree.

- In the formation of the global educational environment, it is of particular importance to ensure its continuity and quality, and to focus on creative development, the minister began. - Vocational educational institutions - vocational schools, colleges and technical schools, which train staff at primary, secondary and secondary special professional education levels. The importance of training qualified personnel in professional education is high in the implementation of the 4th, 8th, 1st, 5th and other items of the UN Sustainable Development Goals. For this purpose, the work carried out in the system was studied, the opinions of international experts were received, and suggestions were made on the directions set by the President to take the development of the sector to a new level. increasing the efficiency of the system, introducing international education programs, and training competitive middle-level personnel in accordance with the requirements of the domestic and foreign labor market.

- What level of specialists are selected for personnel training in technical schools?

- The "Pearson" company improves the qualifications of technical school managers and pedagogues through short courses and gives a certificate. The educational process in technical schools is conducted by teaching staff with BTEC certificate. Laboratories and workshops are equipped with the most modern equipment. As a result, internationally recognized educational programs are introduced, and the qualifications of graduates are recognized in foreign countries. Like all fields, educational processes, including technical

schools, will be digitized step by step, modern educational literature, methodical manuals, digital content, laboratories and workshops will be provided with modern equipment. Digitization of the educational process, placement of educational content on the platform by pedagogues increases students' educational opportunities. Learning foreign languages is very important in the modern world, especially for various professions. Below is information about the main benefits of knowing foreign languages and their importance for professions: Increased employment opportunities: Those who learn foreign languages will have opportunities to work in international organizations, corporations and foreign branches.

In conclusion, learning foreign languages for various professions is of great importance in today's era of globalization. Knowing the language is very important for acquiring new knowledge and technologies from abroad, developing international relations, strengthening relations with foreign markets and succeeding in various professional fields. Knowledge of foreign languages not only expands opportunities for professional growth, but also helps to be competitive in the conditions of modern requirements and the global job market. This contributes to the training of qualified personnel and the development of the national economy.
