**Abstract:** *This article examines the different methods of teaching English in public schools in the education center. Public schools use a standardized curriculum that includes traditional teaching methods such as differentiated instruction and group activities. In contrast, education centers often integrate technology and personalized learning strategies to support more flexible, student-centered learning. Ultimately, both sides show that English can improve learning outcomes.*

**Key words:** *standardized, technology, instruction, personalized, curriculum, strategies.*

### **Introduction**

English has become the global language of communication, playing a vital role in international business, education, science, and technology. As a result, teaching English as a foreign language (EFL) has gained significant importance worldwide. Traditional methods, such as the grammar-translation approach, have been effective in building foundational knowledge but often fail to equip learners with the communication skills necessary for real-world applications. In response to these limitations, modern approaches to EFL have emerged, emphasizing interaction, contextual learning, and the integration of technology.

### **Traditional Grammar-Translation Method**

Grammar rules- vocabulary, and other methods are the most common methods. Students translate texts from English into their mother tongue. Public schools, especially for primary language learning or in areas with limited resources. Helps students understand grammar and sentence structure, limited attention to speaking and listening skills.

#### **•Grammar-Translation Method (GTM)**

It is their translation, focusing on the grammatical rules between English and the mother tongue. This method is often used in formal or academic contexts, especially for older students, where the main goal is to understand English grammar and vocabulary.

#### **•Communicative Language Teaching (CLT)**

## MODERN PROBLEMS IN EDUCATION AND THEIR SCIENTIFIC SOLUTIONS

To develop the development of communication in the life of students. CLT is common in modern public schools because it encourages interactive learning and real-world use of language. Lessons often include groups, discussions, and role-playing.

### • **Task-Based Language Teaching (TBLT)**

Teaching students English better through oral communication. This method emphasizes students' vocabulary and speaking, students can directly communicate with their mother tongue without relying on their mother tongue. Helps to think in English. Repetition and memorization through exercises and exercises. It is often used to help young learners develop basic language skills in a structured, repetitive way.

### • **Public Schools**

Curriculum is divided into two groups, these are divided into national or regional educational bodies. Curriculum follows specific learning objectives and curriculum for different grades. The main goal is to improve language learning. .listening, speaking, reading and writing but may include more standardized tests and assessments.

### • **Educational centers:**

In private educational centers or language schools, teaching English can be more tailored to the needs of the students, which may include more flexibility and innovative methods. Common methods include.

### • **Immersion Method**

Surround students with language as much as possible at their own pace. Learning centers often emphasize immersion techniques where English is the primary language of instruction, making students more interactive and natural throughout the day. Encourages the use of English in the environment.

### • **Content-Based Instruction (CBI)**

In order to teach English better, it is appropriate to teach them through interesting content such as history or business. Education centers use this method to attract students to specialized topics in English and help them learn the language while acquiring knowledge in other subjects. Can be used to give.

### • **Blended Learning**

Combining traditional face-to-face instruction with online learning tools.

Many language centers try many methods to improve language acquisition, and these methods show that language centers are increasingly using online platforms, applications and digital resources in combination with teaching.

The term teaching method refers to general principles, pedagogy and management strategies. It can be seen that the approach to teaching is divided into two main subjects and can be divided into four groups: teacher-centered approach and student-centered approach. Approach and the use of high-tech materials versus the use of low-tech materials.

The idea behind this method is to help the students in any situation they may encounter. Thus, this training includes focusing on important skills such as thinking,

## MODERN PROBLEMS IN EDUCATION AND THEIR SCIENTIFIC SOLUTIONS

complaining, offering, suggesting and giving instructions. . There are learning and teaching methods that can be used in the communicative language teaching class, so that all the methods can involve the students in the communication process. This is an approach to teaching second and foreign languages that is mainly aimed at developing communicative competence. This approach emphasizes the use of language for meaningful purposes in specific situations.

The method of teaching English adopted at present in school curriculum is functional communicative approach. An approach to language teaching which emphasizes that the goal of language learning is communicative competence.

Basically, Teaching must include two major components sending and receiving information. Ultimately, a teacher tries his best to impart knowledge as the way he understood it. The use of innovative methods in educational institutions has the potential not only to improve education, but also to empower people, strengthen governance and galvanize the effort to achieve the human development goal for the country with a number of educational options available before the present generation learners, the newer trends seem to have emerged in the field of education that have entirely changed the face of traditional system of education. Recent trends, methodologies and developments portray the vital role of education sector in general with its internalization of the education process, stress on quality above quantity, increase in the adoption of technologies, necessity for professional talent etc. The theories and methods are constantly evolving in the field of ELT also. This paper presents the famous trends in the ELT that have been used practically in recent times in the entire world with specific reference to the trends prevalent during the previous decades. The study of classical Latin and analysis of its grammar becomes the model from foreign languages in school and this methods and approaches, new trends to foreign language teaching become known as GTM to communicative method.

### •Conclusion

Public schools and tutoring centers provide students with a sense of challenge and challenge while learning English. Public schools offer a structured environment that focuses on broader language learning, while tutoring centers offer specific goals and personalized approaches. .The teaching methods of both sides may vary depending on the context, but both sides aim to improve students' language in meaningful ways.
