

## EDUCATION AND COMPETITIVENESS IN UZBEKISTAN: IS THE SYSTEM REACHING THE INTERNATIONAL LEVEL?

**Rahmatova Marhabo Ravshanjon qizi**

*Samarkand State Institute of Foreign Languages*

**Abstract:** *This article analyzes recent reforms in the education system of Uzbekistan, focusing on educational quality and competitiveness. Particular attention is paid to the participation of higher education institutions in international rankings, the establishment of foreign university branches, the implementation of the credit-modular system, and the widespread use of digital education technologies. The study highlights the integration of Uzbekistan's education system into the global educational space and its capacity to train competitive human capital under conditions of global competition. Furthermore, the article discusses the potential for achieving innovative development through strengthening competition in education.*

**Keywords:** *education system, competitiveness, international rankings, higher education, educational reforms, globalization*

**Annotatsiya:** *Ushbu maqolada O'zbekistonda ta'lim tizimining so'nggi yillardagi islohotlari, ta'lim sifati va raqobatbardoshlik masalalari tahlil qilinadi. Xususan, oliy ta'lim muassasalarining xalqaro reytinglardagi ishtiroki, xorijiy universitetlar filiallarining ochilishi, kredit-modul tizimining joriy etilishi hamda raqamli ta'lim texnologiyalarining keng qo'llanilishi masalalariga e'tibor qaratiladi. Tadqiqotda O'zbekiston ta'lim tizimining xalqaro ta'lim makoniga integratsiyalashuvi va global raqobat sharoitida kadrlar tayyorlash salohiyati ilmiy-nazariy jihatdan yoritiladi. Shuningdek, ta'limda raqobatni kuchaytirish orqali innovatsion rivojlanishga erishish imkoniyatlari muhokama qilinadi.*

**Kalit so'zlar:** *ta'lim tizimi, raqobatbardoshlik, xalqaro reytinglar, oliy ta'lim, ta'lim islohotlari, globallashuv*

**Аннотация:** *В данной статье анализируются реформы системы образования в Узбекистане за последние годы с акцентом на качество образования и конкурентоспособность. Особое внимание уделяется участию высших учебных заведений в международных рейтингах, открытию филиалов зарубежных университетов, внедрению кредитно-модульной системы, а также широкому применению цифровых образовательных технологий. В исследовании освещается интеграция системы образования Узбекистана в мировое образовательное пространство и ее потенциал в подготовке конкурентоспособных кадров в условиях глобальной конкуренции. Также рассматриваются возможности достижения инновационного развития за счет усиления конкуренции в сфере образования.*

## MODERN PROBLEMS IN EDUCATION AND THEIR SCIENTIFIC SOLUTIONS

**Ключевые слова:** *система образования, конкурентоспособность, международные рейтинги, высшее образование, образовательные реформы, глобализация*

In the context of accelerating globalization processes, the education system has emerged as one of the decisive factors in the socio-economic development of countries. The quality of education, its competitiveness, and compliance with international standards are considered key indicators that determine a state's position in the global arena. From this perspective, the educational reforms implemented in Uzbekistan in recent years are of particular significance, as they are aimed at modernizing the education system, integrating it into the international educational space, and improving the quality of human capital training. This article provides a scholarly analysis of the formation of a competitive environment within Uzbekistan's education system, its alignment with international experience, and its prospects at the global level.

The issue of education and competition has been widely studied in the fields of pedagogy, sociology, and economics. International research evaluates competition within education systems as a factor that stimulates innovation, enhances educational quality, and ensures the preparation of a workforce aligned with labor market demands. Scholars such as Altbach, Knight, and Marginson emphasize that the globalization of higher education has fostered a healthy competitive environment among universities. According to their views, international rankings, academic mobility, and joint educational programs encourage educational institutions to pursue continuous development.

In the studies of Uzbek scholars, educational reform is examined in close connection with national development strategies. In particular, the expansion of academic and financial autonomy of higher education institutions, the development of the non-state education sector, and the operation of branches of foreign universities are identified as key factors strengthening competition in education. The literature review indicates that competition is determined not only by the increase in the number of educational institutions but also by the quality of educational content, teaching methodologies, and research activities.

From a practical standpoint, the introduction of the credit-modular system, increased attention to international accreditation processes, and the widespread application of digital education platforms in Uzbekistan contribute to aligning educational quality with international standards. At the same time, several studies point out existing challenges, including uneven development of competition in education, regional disparities, and issues related to human resource capacity. Thus, the literature review demonstrates that alongside positive developments in Uzbekistan's progress toward international educational standards, there remain systemic challenges that require a comprehensive and consistent approach.

## MODERN PROBLEMS IN EDUCATION AND THEIR SCIENTIFIC SOLUTIONS

In conclusion, the issue of education and competition has gained strategic importance in Uzbekistan today. The ongoing reforms in the education system, the expansion of international cooperation, and the formation of a competitive environment contribute to the country's integration into the global educational space. Nevertheless, ensuring sustainable improvement in educational quality, strengthening research activities, and fully aligning with international standards require the implementation of coherent and comprehensive measures. By fostering healthy competition in education, Uzbekistan can achieve the capacity to train competitive professionals not only at the regional but also at the international level.
